

LICENCING RESEARCH DATA: ADP's Experience

Irena Vipavc Brvar,

CESSDA Expert Seminar, Tampere, Finland, Oktober 2012

Outline

I will be talking about

- Reasons for licensing research data
- Processes in ADP
- Creative Commons licences

Why license research data?

The open data argument

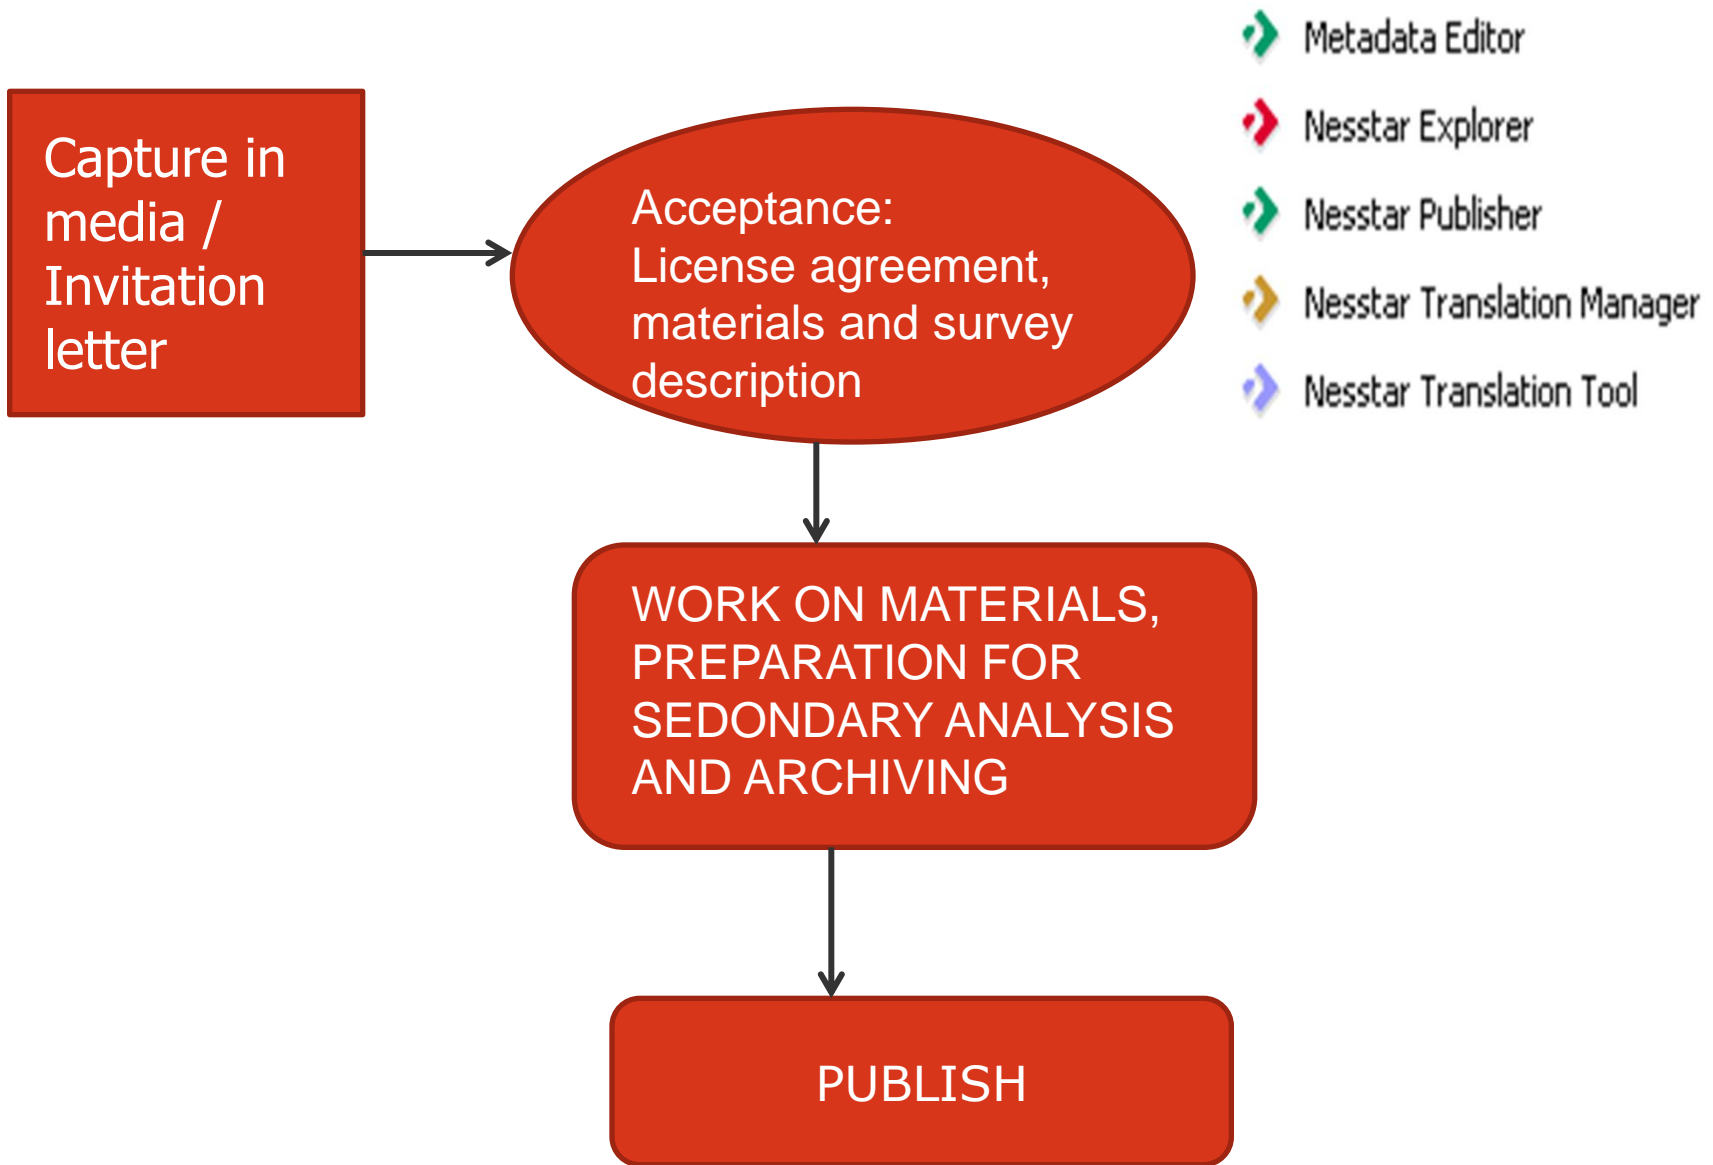

- To allow the data to be used in new ways: comparative studies, data mining, interdisciplinary studies, 'citizen science'.
- To permit greater scrutiny of research
- To raise standards of documentation
- To protect researchers from challenges
- To accelerate community-wide learning from experience
- To increase efficiency
- To increase impact

The pragmatic argument

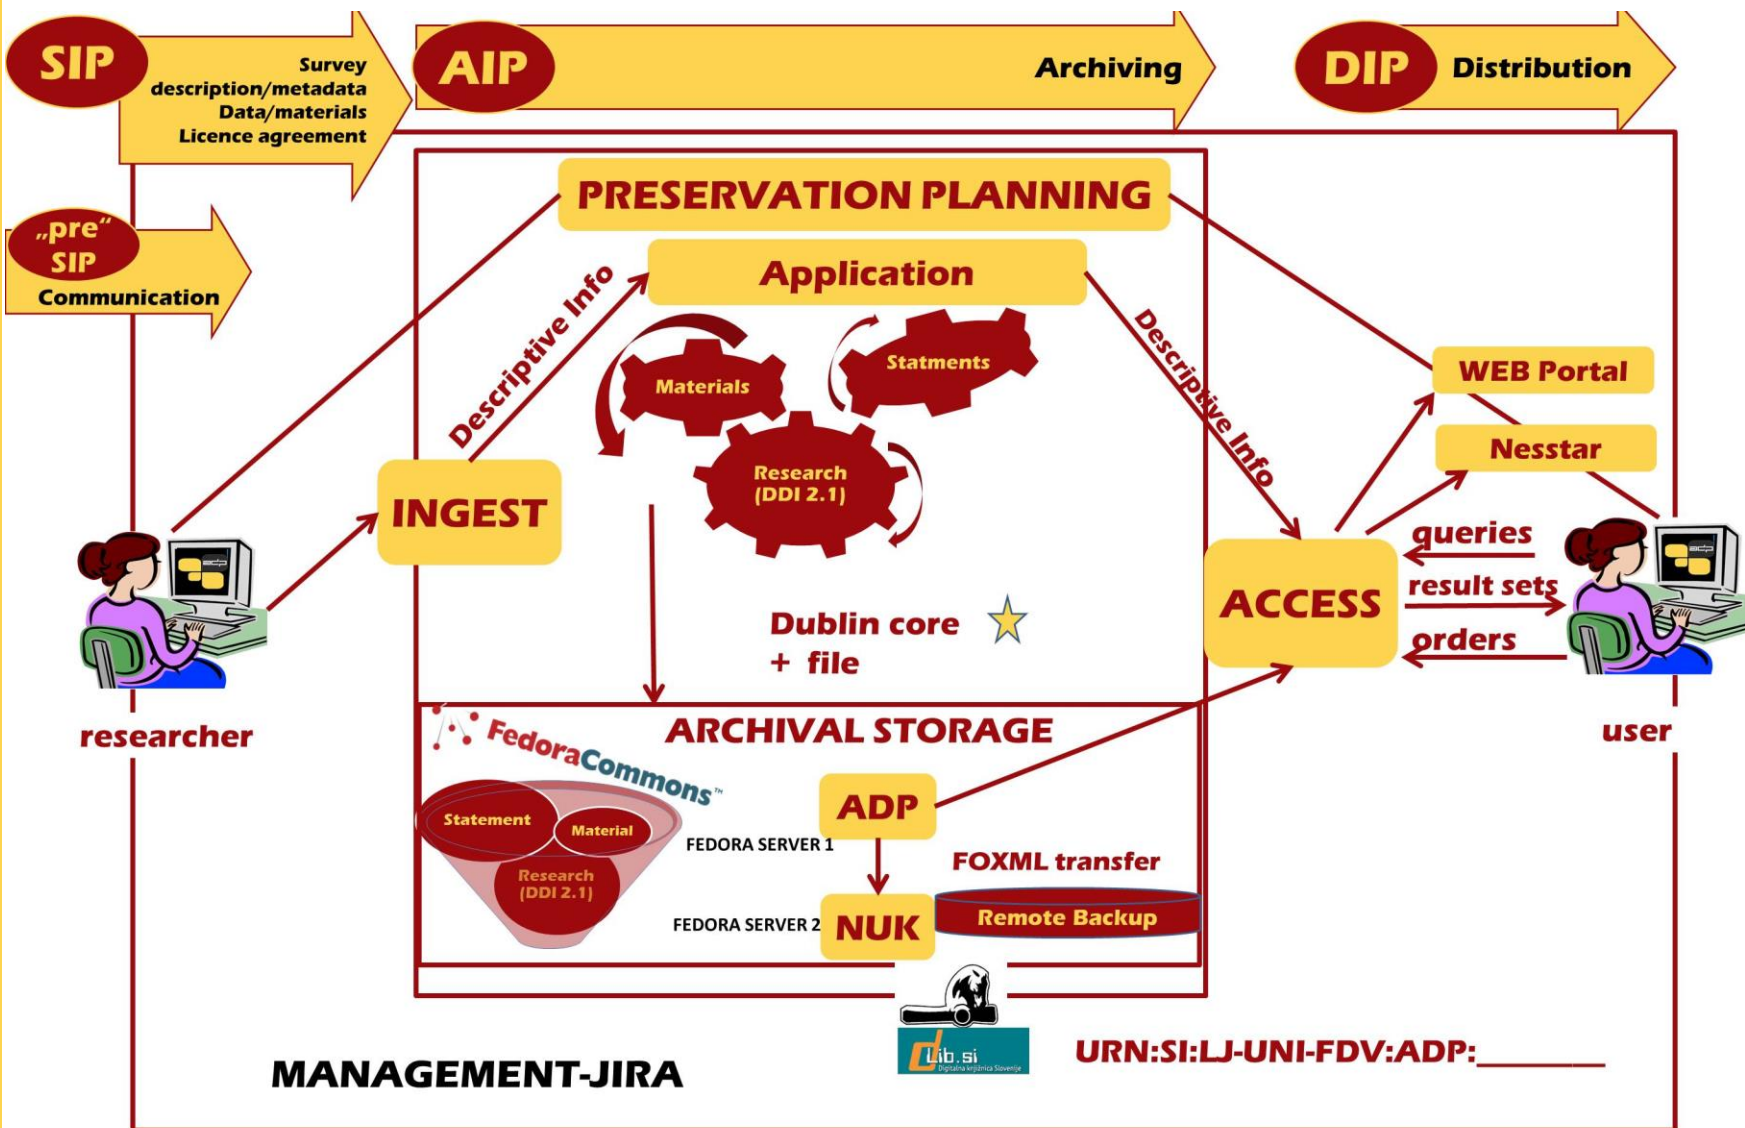

- To provide clarity

Alex Ball, DCC, 2011

Data flow in ADP

DATA FLOW

Creative Commons

...is one of several copyright licenses that allow the distribution of copyrighted works.

A Creative Commons license is used when an author wants to give people the right to share, use, and even build upon a work that they have created.

Attribution (by)

Noncommercial (nc)

No Derivative Works
(nd)

Share-alike (sa)

Attribution (by)

Licensees may copy, distribute, display and perform the work and make derivative works based on it only if they give the author or licensor the credits in the manner specified by these.

Noncommercial (nc)

Licensees may copy, distribute, display, and perform the work and make derivative works based on it only for **noncommercial** purposes.

No Derivative Works (nd)

Licensees may copy, distribute, display and perform only verbatim copies of the work, not **derivative works** based on it.

Share-alike (sa)

Licensees may distribute derivative works only under a license identical to the license that governs the original work. (See also **copyleft**.)

		Can someone use it commercially?	Can someone create new versions of it?
Attribution			
Share Alike	 		Yup, AND they must license the new work under a Share Alike license.
No Derivatives	 		
Non-Commercial	 		Yup, AND the new work must be non-commercial, but it can be under any non-commercial license.
Non-Commercial Share Alike	  		Yup, AND they must license the new work under a Non-Commercial Share Alike license.
Non-Commercial No Derivatives	  		

License Agreement in ADP

- **Depositor** (name, institution, position)
- Name of the **survey**

- **Confidentiality** agreement / own copy
- **Copyright (CC + _____)**
- **Terms of Use** in order to protect the confidentiality of data

Enters into force when **both parties** (could be more than 1 depositor) sign the agreement.

Attached – list of deposited materials.

License Features

Your choices on this panel will update the other panels on this page.

Allow modifications of your work?

- Yes No
- Yes, as long as others share alike

Allow commercial uses of your work?

- Yes No

License Jurisdiction:

CC License Agreements in ADP

Attribution CC BY

Default

This license lets others distribute, remix, tweak, and build upon your work, even commercially, as long as they credit you for the original creation. This is the most accommodating of licenses offered. Recommended for maximum dissemination and use of licensed materials.

Attribution-NonCommercial CC BY-NC

This license lets others remix, tweak, and build upon your work non-commercially, and although their new works must also acknowledge you and be non-commercial, they don't have to license their derivative works on the same terms.

Principles for Open Data in Science

Panton Principles

Principles for Open Data in Science

Science is based on building on, reusing and openly criticising the published body of scientific knowledge.

For science to effectively function, and for society to reap the full benefits from scientific endeavours, it is crucial that science data be made **open**.
